

About MSRASC

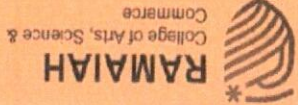

Dr. M S Ramiah, a visionary and philanthropist established "Gokula Education Foundation (GEF)", in the year 1962, to deliver education and healthcare for the betterment of mankind. Under the tutelage of GEF, Ramiah college of Arts, Science and Commerce (RCASC) was established in 1994. RCASC is Re-accredited with "A" Grade by NAAC, permanently affiliated to Bangalore University (BU) and Bengaluru Central University, and approved by AICTE.

About the AISH

The All-India Institute of Speech and Hearing was established in the year 1966 as an autonomous institute fully funded by the Ministry of Health and Family Welfare, Government of India. AISH functions as an autonomous organization under the direction of the Executive Council with the Hon'ble Union Minister of Health and family welfare as chairman and the Hon'ble Minister of Health and family welfare, Government of Karnataka as the Vice-Chairman.

About Department

The department was conventional in the year 2008, now offering under graduate course BSc in Electronics. The has well established spacious laboratories with advanced Electronic calibration systems with qualified faculties to provide good lab facility. The course syllabus followed BOS Electronics prescribed by the Bengaluru City University. The Additional CSR activity is engaged in every year to sensitize the campus, student and public.

विषय/Sub: Permission for conducting webinar to teachers and students
(w.r.t. Communication disorders)- Reg.

Dear Madam,

The All India Institute of Speech and Hearing (AIISH) is an autonomous institution fully funded by and functioning under the Ministry of Health and Family Welfare, Government of India. The major objectives of the institute are to impart professional training, conduct research, render clinical services, and educate public and allied professionals on prevention, early identification and intervention of communication disorders.

The MS Ramaiah College of Arts Science & Commerce has a well-established Centre and will be an important resource for us to spread awareness about Communication disorders amongst an important part of our society, the teaching community and students. As one of the public education activities of the Department of Prevention of Communication Disorders (POCD) at AIISH, the institute is conducting regular orientation programmes to the school/college teachers and students on the prevention and early identification of such conditions in new born babies to elderly individuals. At present due to the COVID pandemic we are trying to reach out through webinars in virtual mode. The duration of the webinar will be approximately one hour and can be conducted at a convenient time for the participants. In this regard we seek your kind cooperation in granting permission for the same and it would be highly appreciated if you could kindly do the needful to help us to reach out to maximum number of teachers and students.

Thanking you and with best regards,

Yours sincerely

M. Pushpavathi

Report on online social awareness program on “prevention of Communication disorder”

Date: 25.01.2022

Platform: Cisco Webex

The Electronics Department and NCC (Air wing), in association with AIISH (All India Institute of Speech and Hearing, Mysore-570006) is conducting an online social awareness program on “prevention of Communication disorder” for all the staff and students on 25.01.2022, from 2.00-3.00 pm.

Objective

The major objectives of this program is to brings the awareness on prevention and early identification of speech and hearing problems in the newly born babies to elderly individuals.

Resource person:

Dr. N. Sreedevi

Professor of Speech Sciences and Head, Department of Prevention of Communication Disorders

All India Institute of Speech and Hearing, Manasagangothri, Mysuru – 570006

Karnataka, India.

The webinar focussed on the following areas: -

Dr. N. Sreedevi explained that the communication disorders in early childhood. It is more important to identify the early detection of any disorder for treatment and it reduces risk of life. Communication disorder may happen for many reasons but some kids born with the disease itself or develop during the childhood development. Some of the conditions we are discussing today are

- Hearing loss,
- Injury in the brain
- Emotional and neurological disorders

- Development disorder
- Injury in the vocal chord
- Intellectual disability

Some kids are suffering from speech and sound disorder (SSD); those kids are unable to pronounce the words properly for example they cannot pronounce 'r' but they are using 'l' instead of 'r'. Few kids, later come out with this problem after certain duration but some of them carry the problem throughout their entire life. This can be treated with proper guidance in early detection. If we left this disorder left untreated, it will affect the child in his all activities like learning ability, write and reading skills.

Phonological disorder is one in which children are not possible to produce the words properly they are creating different sound because they are creating word in wrong part of their mouth which mean they are pronouncing in back part of their mouth. These communication disorders need to be identified at the beginning stage help them to solve their problem as well as it will them to build the strategy for better communication disorder. The family people play a dominant role to solve this kind of issues because the family people also required to work to resolve this kind communication issues among children's along with the therapist.

Generally, the communication disorders are identified in the home or before joining to the school itself but it is rare case where we can identify some minor communication disorders in the school level also. As per the individual Disability Education Act each and every student with disability also have rights to get equal education like a normal child, schools also facilitating to these children to develop individual Education program.

Articulation is one condition in this state of phonetic level due to the deficiency in the vocal organs. Here we can see some of the symptoms of articulations are distortion of sound, substitution omission and additional sounds. For example, child may tell dough instead of dog.

Language disorder causes because of lack of vocabulary, in this condition child or adult struggle to understand hence it is not possible to construct meaning full phrases or to understand the meaning full statements it is mainly because of hearing loss or any other kind of mental issues.

Hearing loss is the major problem which cause the communication disorder because it will build a gap between the normal person with dough person. With the help of audiologist and electronic hearing aids support will eradicate this problem and build a confidence among the people who

suffering from this problem.

Proper communication is very important for a human being to lead the normal life in this society. The people with communication disorders are isolating from the society because of their disability but it is our responsibility to bring them up and helping them to lead the normal life like all of us. As a human being it is our duty to support these king of people. So early detection of communication disorder will reduce the much problem and some of them can be cured completely so identifying and providing proper treatment is required to eliminate the communication disorder. Family, society and therapist support will help the child to overcome from the communication disorder.

Outcome:

Audience acquires the knowledge about the different speech disorder and the symptoms to identify them in the early stage. They also obtain the knowledge about the different communication disorders, all communication disorders can be cured, many of them can be managed with the help of a speech therapist.
